

## Scalefree™ Instructions

Do not exceed recommended dose.

**Note:** Cationic polymers used in many clarifiers, flocculants and polyquat algaecides should not be dosed to swimming pool water at the same time as metal control products. Cloudy water, precipitation and reduced product effectiveness may result. Wait 24 hours between additions.

Do not use with biguanides.

### **Directions for use:**

This product is designed for use in properly balanced pool water.

Following dosage chart below, add the recommended initial dosage of **Scalefree** directly to the pool.

**Note:** If water hardness level in existing pool water is above 400ppm (parts per million), follow recommendations for fresh fill initial dose. Brushing is required. After initial dose, proceed with double the recommended monthly dosage. **Do not use with biguanides.**

### **Dosage Chart**

| Pool Size      | Initial Dose |                     | Maintenance    |
|----------------|--------------|---------------------|----------------|
|                | Fresh Fill   | Existing Pool Water | Monthly Dosage |
| 10,000 gallons | 64oz         | 32oz                | 5oz            |
| 20,000 gallons | 128oz        | 64oz                | 10oz           |

\* If preferred, **Scalefree** can be added weekly. Take the recommended monthly dosage and divide it by 4.
